

TRACE Advanced Memory Forensics Report

File Analyzed: dummy.raw
Scan Timestamp: 2026-05-13T05:08:16Z
Threat Score: 85/100
Severity Level: HIGH

AI-Assisted Forensic Summary

HIGH SEVERITY ALERT: Multiple forensic indicators point to a successful compromise. Suspicious processes are running with elevated privileges, and anomalous network connections to known bad subnets are active.

Malware Indicators

Indicator Details
Reflective DLL Injection detected
Code cave execution found in lsass.exe
Unbacked executable memory regions

Suspicious Processes

Process Name
cmd.exe
mimikatz.exe
explorer.exe

Hidden Processes

Process Name
proc_hidden_844.exe
rootkit_core.sys

DLL Injections

DLL Name
ws2_32_monitor.dll

Network Connections

Connection String
192.168.1.10:49211 -> 45.33.12.90:443 (ESTABLISHED)

Registry Anomalies

Registry Path
HKCU\Software\Microsoft\Windows\CurrentVersion\Run\MaliciousUpdate
HKLM\SYSTEM\CurrentControlSet\Services\HiddenSvc
